

PRADHAN MANTRI KRISHI SINCHAYEE YOJANA (PMKSY)

Operational Reference Document: 2021–2026 Extension Cycle

Comprehensive Framework for Core Components, 'Per Drop More Crop' Realignment, and M-CADWM Integration

1. Executive Overview & Institutional Extension

The Government of India has approved the continuation of the Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) through the **2021–2026** funding loop with an overall macro financial outlay of **Rs. 93,068.56 crore**. The strategic vision ensures a comprehensive end-to-end cycle covering water sourcing, farm distribution, precise local application, and micro-level extension systems.

Key long-term milestones achieved up to recent evaluation cycles show benefits extended to over 27 million farmers, with a cumulative command area deployment exceeding 24.61 million hectares nationwide.

2. Strategic Component Architecture

PMKSY functions through a highly converged programmatic layout executed across three nodal central ministries:

- **Accelerated Irrigation Benefit Programme (AIBP)**: Handled by Department of Water Resources, RD & GR. Focuses on the time-bound execution of major, medium, and national-scale irrigation infrastructure pipelines.
- **Har Khet Ko Pani (HKKP)**: Aims to expand physical access on individual farmlands via sub-components including Surface Minor Irrigation, Command Area Development, and Ground Water development.
- **Watershed Development (WDC 2.0)**: Supervised by the Department of Land Resources. Directs soil moisture capture, ridge-to-valley treatments, and traditional rainwater pool renewals.
- **Per Drop More Crop (PDMC)**: Promotes precision agricultural setups (drip, sprinkler systems) to achieve optimal on-farm volumetric water optimization.

3. Operational Realignment of 'Per Drop More Crop' (PDMC)

To optimize local scheme execution, funding distributions, and minimize cross-departmental layers, the **Per Drop More Crop** micro-irrigation layout has been realigned to operate within the financial architecture of the **Pradhan Mantri Rashtriya Krishi Vikas Yojana (PM-RKVY)** portal.

Subsidy Mechanisms & Direct Benefit Transfer (DBT): Assistance under PDMC is tightly governed by systemic direct account disbursements linked strictly to Aadhaar-seeded profiles. Financial weights are distributed as follows:

Farmer Target Classification	Subsidy Component Share	Funding Ratio (Govt / State)
Small and Marginal Farmers	55% of indicative unit costs	General States: 60:40 NE & Himalayan: 90:10 Union Territories: 100:0
Other / General Farmers	45% of indicative unit costs	General States: 60:40 NE & Himalayan: 90:10 Union Territories: 100:0

Note: The same unique land parcel or survey entity cannot access the micro-irrigation financial support loop more than once within a strict 7-year implementation window. Max beneficiary cap is restricted to 5 hectares per individual registration.

4. Modernization Framework (M-CADWM)

The Union Cabinet has introduced the **Modernization of Command Area Development and Water Management (M-CADWM)** sub-scheme as a technology upgrade under PMKSY. Operating with a dedicated capitalization of **Rs. 1,600 crore**, this modernization push focuses on transitioning primitive open-field channel grids into pressurized piped distribution networks linked directly to on-farm micro-irrigation lines.

5. District Irrigation Plans (DIPs) & Planning Control

All execution streams under PMKSY rely completely on the mandatory drafting of **District Irrigation Plans (DIPs)** and State Irrigation Plans (SIPs). These files act as the baseline master blueprint for tracking geo-mapped micro-storage setups, localized runoff check-structures, and tailoring state-approved vendor installation lists to specific farmer clusters.
